Macksteel

Metal Everything.

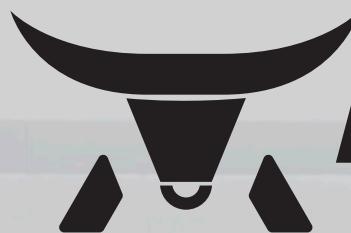

Macksteel Warehouse had its start in 1973 when founders Steve and Beverly Mack began a portable bailing business, traveling the region processing scrap metals. A few years later the current property was purchased, and Mack Wrecking, Inc. was formed as a scrap iron and metal recycler.

During the 80s, the retailing of new and surplus steel was added. During this time the scrap recycling and retail steel businesses both experienced steady growth. In 1998, the scrap division was

sold, and the company changed its name to Macksteel Warehouse, Inc. The sale allowed management to focus on the metal service center side of the business, and fabrication equipment was added, allowing Macksteel to produce finished products.

Today, we operate nearly 145,000 sq ft with the latest metal fabrication technology. Our unique integration of metal distribution, fabrication, and manufacturing has allowed Macksteel to continue to grow.

MACKSTEEL
FARM AND RANCH EQUIPMENT

Decades later, our unique integration of metal distribution, fabrication, and manufacturing has allowed Macksteel to grow into one of the region's leaders in Farm and Ranch Equipment manufacturing and distribution – building products to last generations.

With over 120 dealers across 16 states, we have grown our product list to include cattle handling, equine, feeding equipment, equipment attachments, gates, panels, and now arena equipment.

We take every growth opportunity seriously and test our products against competitors the best we can prior to product launches. We have received overwhelming support from our dealer network and our return customers which has solidified our place in the farm and ranch products industry.

BUCKING CHUTES

The Macksteel bucking chutes have been designed with close attention to safety and input from professional cowboys and contractors. We've eliminated the overhead roller system seen on other chutes in the industry allowing for 40" of clear catwalk. The stow away catwalk design has pull out steps and grab handles centered in every chute. Our rolling slide gates are filled with composite planks to stand up to the toughest stock and feature a self-cleaning channel between each chute.

PRE-SORT PEN PACKAGE

This pre-sort pen allows you to pre-sort steers or calves for timed events for a more efficient and organized operation. This package can be used with center loading or side loading to fit your operation. The package features a combination of bow gates and mounting frames for the gates to attach too. These components are all constructed from our 2" 16ga. round tubing and finished with Macksteel textured gray powder coat.

- Pre-sort up to 12 timed event animals
- Fast set up using arena panel pin and loop design
- Spring loaded gate latches
- Small footprint

ARENA PANELS

Macksteel arena panels are designed with the industry standard pin and loop design and made from 2" 16ga. round tubing. These panels allow you to set up an arena or corrals without the need for connector posts.

12' CALF SHELTER

Our shelters are covered by 22ga. steel decking and include a sheet metal end wall with a half door on the front. The front half door and patterned sheet metal holes allow for ample air flow and easy access for calves and ranchers. The door is secured with a simple pin design and can quickly be removed and opened for access.

The lifting angle allows you to easily move the calf shelter with a bucket, forks, or grapple.

PART NUMBER: MP66144

24' CALF SHELTER

Our shelters are covered by 22ga. steel decking and include sheet metal end walls with a walk-in access door complete with a slam latch.

HANGING BALE FEEDER

This product is a game changer for any round bale feeding operations. Save hay, save time, and save money with this hanging bale feeder. New lower chain locations reduces risk to livestock. Suspended from $\frac{3}{16}$ " chain, minimal waste is experienced as air is allowed to flow through the feeder and your horses can access the entire bale.

These feeders come with a 1 $\frac{3}{4}$ " hay net which provide slow feed and hay saving features.

Also available with 2 $\frac{1}{2}$ " livestock net.

LENGTH	WIDTH	HEIGHT	WEIGHT
84"	84"	72"	700 LBS

HAY RACKS

These powder coated hay racks are a must for combo feeding your horses hay and grain. The clearance allows the horses to eat from the pan without rubbing on the bars and provides a catch for hay as it is pulled from the rack. The round tube design allow these to be easily moved around and positioned and are built to withstand wind, ornery horses, and kids that don't know how to drive tractors.

These are available in 4' and 8' lengths.

Also available with custom net by Haylo Haynets.

PASTURE GATES

The 6-bar pasture gates are built with 1.5" 16ga. round tubing and some have vertical sheet metal uprights for added structure. The 6-bar spacing matches our heavy duty bull gates giving you the security needed but the light weight for use in low pressure areas. These gates come with an easily adjustable $\frac{3}{4}$ " x 12" threaded rod hinge.

PANELS

CONTINUOUS FENCE PANELS

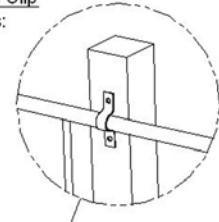

Our continuous fence panels are second to none. We use an extra upright to make sure they stand the test of time and hold up to the toughest stock. Our panels include clips and splicers required to get the job done.

- Available in 1 1/4" round tube or 1 5/8" round tube
- Comes with clips and splicers, lag screw sold separately
